OFFICE OF PETITIONS

In re Patent No. 7,460,863 :
Ryan S. Steelberg : DECISION ON
Issue Date: December 2, 2008 : REQUEST FOR RECONSIDERATION
Application No. 10/086,193 : OF
Filed: February 27, 2002 : PATENT TERM ADJUSTMENT
Attorney Docket No. 16113-1177001 :
/ GP-883-22 :

This is a decision on the "**APPLICATION FOR PATENT TERM ADJUSTMENT UNDER 37 C.F.R. 1.705(d)**," filed February 2, 2009, requesting that the patent term adjustment determination for the above-identified patent be changed from twenty-seven hundred (27) days to five hundred (500) days.

The request for reconsideration of patent term adjustment is **DISMISSED**.

On December 2, 2008, the above-identified application matured into U.S. Patent No. 7,460,863 with a patent term adjustment of 27 days. This request for reconsideration of patent term adjustment was timely filed within two months of the issue date of the patent. See 1.705(d).

The Office acknowledges submission of the \$200.00 fee set forth in 37 CFR 1.18(e). No additional fees are required.

Patentees request recalculation of the patent term adjustment based on the decision in *Wyeth v. Dudas*, 580 F. Supp. 2d 138, 88 U.S.P.Q. 2d 1538 (D.D.C. 2008). Patentees assert that pursuant to *Wyeth*, a PTO delay under §154(b)(1)(A) overlaps with a delay under §154(b)(1)(B) only if the delays "occur on the same day." Patentees request recalculation of the patent term adjustment to include a 473 day period of adjustment pursuant to 37 C.F.R. §1.703(b). Patentees maintain entitlement to a period of

adjustment due to the Three Year Delay by the Office, pursuant to 37 CFR § 1.703(b), of 473 days and the period of adjustment due to other examination delay, pursuant to 37 CFR §1.702(a), of 501 days. Patentees argue that only one day, June 9, 2005 overlaps.

The 474 day period is calculated based on the application having been filed under 35 U.S.C. §111(a) on February 27, 2002, and a request for continued examination (RCE) having been filed in this application on June 16, 2006, three years and 474 days later. Patentees assert that in addition to this 474 day period, they are entitled to a period of adjustment due to examination delay, pursuant to 37 CFR §1.702(a), totalling 501 days. This 501 day period is the sum of:

- a period of delay of 500 days for the failure by the Office to mail at least one of a notification under 35 U.S.C. 132 not later than fourteen months after the date on which the application was filed under 35 U.S.C. 111(a), pursuant to § 1.702(a)(1);
- a period of delay of 1 day for the failure by the Office to respond to a reply under 35 U.S.C. 132 not later than four months after the date on which the reply was filed, pursuant to § 1.702(a)(2);

Under 37 CFR § 1.703(f), patentees are entitled to a period of patent term adjustment equal to the period of delays based on the grounds set forth in 37 CFR §1.702 reduced by the period of time equal to the period of time during which applicants failed to engage in reasonable efforts to conclude prosecution pursuant to 37 CFR §1.704. In other words, the period of Office delay reduced by the period of applicant delay. The period of reduction of 474 days for applicant delay is not in dispute.

Patentees do not dispute that the total period of Office delay is the sum of the period of Three Years Delay (474 days) and the period of Examination Delay (501 days) to the extent that these periods of delay are not overlapping.

Patentees contend that 1 day for the failure by the Office to respond to a reply under 35 U.S.C. 132 not later than four months after the date on which the reply was filed, pursuant to § 1.702(a)(2) (June 9, 2005) overlaps with a portion of the Three Year delay period (February 28, 2005 to June 16, 2006).

Thus, according to patentees the total period of overlap is 1 days.

Patentees' submit that the total period of Office Delay is 974 days, which is the sum of the period of Three Year Delay (474 days) and the period of Examination Delay (501 days), reduced by the period of overlap (1 day).

As such, patentees assert entitlement to a patent term adjustment of 500 days (474 + 501 reduced by 1 overlap - 474 (applicant delay)).

The Office agrees that as of the filing of the RCE on June 16, 2006, the application was pending 3 years and 474 days after its filing date. The Office agrees that the actions detailed above were not taken within the specified time frames, and thus, the entry of a period of adjustment of 501 days is correct. At issue is whether patentees should accrue 473 days (adjusted for overlap, per patentees' definition of overlap) of patent term adjustment for the Office taking in excess of three years to issue the patent, as well as, 501 days for Office failure to take certain actions within specified time frames (or examination delay).

The Office contends that 474 days overlap. Patentees' calculation of the period of overlap is inconsistent with the Office's interpretation of this provision. 35 U.S.C. 154(b)(2)(A) limits the adjustment of patent term, as follows:

to the extent that the periods of delay attributable to grounds specified in paragraph (1) overlap, the period of any adjustment granted under this subsection shall not exceed the actual number of days the issuance of the patent was delayed.

Likewise, 37 CFR 1.703(f) provides that:

To the extent that periods of delay attributable to the grounds specified in §1.702 overlap, the period of adjustment granted under this section shall not exceed the actual number of days the issuance of the patent was delayed.

As explained in *Explanation of 37 CFR 1.703(f) and of the United States Patent and Trademark Office Interpretation of 35 U.S.C.*

154(b)(2)(A), 69 Fed. Reg. 34283 (June 21, 2004), the Office interprets 35 U.S.C. 154(b)(2)(A) as permitting either patent term adjustment under 35 U.S.C. 154(b)(1)(A)(i)-(iv), or patent term adjustment under 35 U.S.C. 154(b)(1)(B), but not as permitting patent term adjustment under both 35 U.S.C. 154(b)(1)(A)(i)-(iv) and 154(b)(1)(B). Accordingly, the Office implements the overlap provision as follows:

If an application is entitled to an adjustment under 35 U.S.C. 154(b)(1)(B), the entire period during which the application was pending (except for periods excluded under 35 U.S.C. 154(b)(1)(B)(i)-(iii)), and not just the period beginning three years after the actual filing date of the application, is the period of delay under 35 U.S.C. 154(b)(1)(B) in determining whether periods of delay overlap under 35 U.S.C. 154(b)(2)(A). Thus, any days of delay for Office issuance of the patent more than 3 years after the filing date of the application, which overlap with the days of patent term adjustment accorded prior to the issuance of the patent will not result in any additional patent term adjustment. See 35 U.S.C. 154(b)(1)(B), 35 U.S.C. 154(b)(2)(A), and 37 CFR § 1.703(f). See *Changes to Implement Patent Term Adjustment Under Twenty Year Term; Final Rule*, 65 Fed. Reg. 56366 (Sept. 18, 2000). See also *Revision of Patent Term Extension and Patent Term Adjustment Provisions; Final Rule*, 69 Fed. Reg. 21704 (April 22, 2004), 1282 Off. Gaz. Pat. Office 100 (May 18, 2004). See also *Explanation of 37 CFR 1.703(f) and of the United States Patent and Trademark Office Interpretation of 35 U.S.C. 154(b)(2)(A)*, 69 Fed. Reg. 34283 (June 21, 2004).

The current wording of § 1.703(f) was revised in response to the misinterpretation of this provision by a number of Patentees. The rule was slightly revised to more closely track the corresponding language of 35 U.S.C. 154(b)(2)(A). The relevant portion differs only to the extent that the statute refers back to provisions of the statute whereas the rule refers back to sections of the rule. This was not a substantive change to the rule nor did it reflect a change of the Office's interpretation of 35 U.S.C. 154(b)(2)(A). As stated in the *Explanation of 37 CFR 1.703(f) and of the United States Patent and Trademark Office Interpretation of 35 U.S.C. 154(b)(2)(A)*, the Office has consistently taken the position that if an application is entitled to an adjustment under the three-year pendency

provision of 35 U.S.C. 154(b)(1)(B), the entire period during which the application was pending before the Office (except for periods excluded under 35 U.S.C. 154(b)(1)(B)(i)-(iii)), and not just the period beginning three years after the actual filing date of the application, is the relevant period under 35 U.S.C. 154(b)(1)(B) in determining whether periods of delay "overlap" under 35 U.S.C. 154(b)(2)(A).

This interpretation is consistent with the statute. Taken together the statute and rule provide that to the extent that periods of delay attributable to grounds specified in 35 U.S.C. 154(b)(1) and in corresponding §1.702 overlap, the period of adjustment granted shall not exceed the actual number of days the issuance of the patent was delayed. The grounds specified in these sections cover the A) guarantee of prompt Patent and Trademark Office responses, B) guarantee of no more than 3 year application pendency, and C) guarantee or adjustments for delays due to interference, secrecy orders and appeals. A section by section analysis of 35 U.S.C. 154(b)(2)(A) specifically provides that:

Section 4402 imposes limitations on restoration of term. In general, pursuant to [35 U.S.C.] 154(b)(2)(A)-(C), total adjustments granted for restorations under [35 U.S.C. 154(b)(1)] are reduced as follows: (1) To the extent that there are multiple grounds for extending the term of a patent that may exist simultaneously (e.g., delay due to a secrecy order under [35 U.S.C.] 181 and administrative delay under [35 U.S.C.] 154(b)(1)(A)), the term should not be extended for each ground of delay but only for the actual number of days that the issuance of a patent was delayed; See 145 Cong. Rec. S14,718¹

As such, the period for over 3 year pendency does not overlap only to the extent that the actual dates in the period beginning three years after the date on which the application was filed overlap with the actual dates in the periods for failure of the Office to take action within specified time frames. In other words, consideration of the overlap does not begin three years after the filing date of the application.

¹ The AIPA is title IV of the Intellectual Property and Communications Omnibus Reform Act of 1999 (S. 1948), which was incorporated and enacted as law as part of Pub. L. 106-113. The Conference Report for H.R. 3194, 106th Cong. 1st Sess. (1999), which resulted in Pub. L. 106-113, does not contain any discussion (other than the incorporated language) of S. 1948. A section-by-section analysis of S. 1948, however, was printed in the Congressional Record at the request of Senator Lott, See 145 Cong. Rec. S14,708-26 (1999) (daily ed. Nov. 17, 1999).

In this instance, the relevant period under 35 U.S.C. 154(b)(1)(B) in determining whether periods of delay "overlap" under 35 U.S.C. 154(b)(2)(A) is the entire period from the filing date of the application, February 27, 2002, to the filing date of the RCE, June 16, 2006. 501 days of patent term adjustment were accorded prior to the issuance of the patent for the Office failing to respond within specified time frames during the pendency of the application. All of the 474 days for Office delay in issuing the patent overlap with the 501 days of examination delay. During that time, the issuance of the patent was delayed by 501 days, not 501 + 473 days. The Office took 14 months and 500 days to issue a first Office action and took 1 day over 4 months to respond to a reply under 35 U.S.C. 132. Otherwise, the Office took all actions set forth in 37 C.F.R. § 1.702(a) within the prescribed timeframes. Nonetheless, given the initial 501 days of Office delay and the 474 days of applicant delay and the time allowed within the time frames for processing and examination, as of the filing date of the RCE, the application was pending three years and 474 days. Accordingly, 501 days of patent term adjustment was properly entered since the period of delay of 474 days attributable to the delay in the issuance of the patent overlaps with the adjustment of 501 days attributable to grounds specified in § 1.702(a)(1) and § 1.702(a)(2). Entry of both periods is not warranted. 501 days is determined to be the actual number of days that the issuance of the patent was delayed, considering the 474 days over three years to the filing of the RCE.

Accordingly, at issuance, the Office properly entered no additional days of patent term adjustment for the Office taking in excess of 3 years to issue the patent.

In view thereof, no adjustment to the patent term will be made.

Telephone inquiries specific to this matter should be directed to the undersigned at (571) 272-3219.
